

# eClinic Virtual Consultation Platform

Designed exclusively to deliver high quality remote patient care with features specifically for healthcare professionals

## File Sharing

A clinician shared a visual of the anger iceberg in the chat of a CAMHS session, which helped the patient to understand it and then discuss those feelings better.

- Black Country Healthcare NHS Foundation Trust

## Live Translation into 100+ Languages

"It is so much more empowering for a patient to be at the centre of their own appointment, in control of their own health, and to be able to speak with a clinician directly. Inclusivity is a fundamental part of our organisational culture."

- Dione Rogers, CNIO – Kettering General Hospital NHS FT

## Chat Function

During an appointment with a selectively mute patient, the clinician could talk to and see them virtually using eClinic, and the patient could respond through the chat function, allowing them to be an active participant in the session.

- Black Country Healthcare NHS Foundation Trust

## Record and Store Consultation Sessions

"eClinic has been an extremely useful resource for capturing patient stories. It's simple to use and it is really powerful to see the patient in a setting that they feel comfortable in. Staff have reported feeling really valued!"

- Johanna Ashworth Jones, Programme Manager – Wirral University Teaching Hospitals FT

## Real Time Analytics Dashboard

Feedback from BCHT showed that instant reporting and analytics saves hours in admin and allows staff to present results, benefits, and cost savings to senior executives for evidence-based decision making.

- Black Country Healthcare NHS Foundation Trust

## Screen Sharing

"The ability to share your screen to show patients their x-rays etc. has proved to be invaluable."

- Dr. Mohammad Javed, CCIO – Walsall Healthcare NHS Trust
